Town Engineer Stuart Williams gave updates regarding permitting by the groundwater conservation district, the hydrological report, the amended project timeline, a potential groundbreaking event in February, and review by the Texas Commission on Environmental Quality (TCEQ). Public Works Director Dale Alexander stated that the RO skids were expected to be delivered for Lane and 303 in November and February, respectively, adding that the contractor (Dake) had requested a 90-day extension to the contract to allow ample time for site cleanup. City Manager Joe Ashton noted that the City Attorney did not find it necessary for Council to formally approve this change order because it did not increase the cost. At this time, the RO systems on the existing wells (Lane and 303) are expected to be online by early 2025, with work beginning on the elevated storage tank (EST) and RO at the new Miller wellsite by fall of 2025 and those assets coming online in 2026. *THIS ITEM WAS TAKEN OUT OF ORDER. IT WAS CONSIDERED IMMEDIATELY AFTER ITEM 14.*

City Manager Joe Ashton stated that staff recommended acceptance of the proposed rate increases. Town Engineer Stuart Williams stated that this general services IPO allows Kimley-Horn to review smaller hourly items on as-needed basis, such as site plans, developments, or small issues on a resident's property. In response to a question from Williams, Mayor Brewster stated his preference for the Council to formally approve these rate changes annually for budgeting purposes.

There was discussion regarding ending the current fiscal year (FY) under budget, factors contributing to the projected drawdown for FY25, revenue per cent of property tax, a forthcoming fee schedule amendment, residents not being charged for ambulance service, and a decline in sales tax revenue.

Town Engineer Stuart Williams gave updates regarding permitting by the groundwater conservation district, the hydrological report, the amended project timeline, a potential groundbreaking event in February, and review by the Texas Commission on Environmental Quality (TCEQ). Public Works Director Dale Alexander stated that the RO skids were expected to be delivered for Lane and 303 in November and February, respectively, adding that the contractor (Dake) had requested a 90-day extension to the contract to allow ample time for site cleanup. City Manager Joe Ashton noted that the City Attorney did not find it necessary for Council to formally approve this change order because it did not increase the cost. At this time, the RO systems on the existing wells (Lane and 303) are expected to be online by early 2025, with work beginning on the elevated storage tank (EST) and RO at the new Miller wellsite by fall of 2025 and those assets coming online in 2026.
